

Accessories

These hose reels are designed to mount directly to our MX Series, Tube Cart Electric Series and Cold Water Cart Gas Series Pressure Washers. We do not recommend using the 100' reel on any machine weighing less than 170 lbs.

- GEN D30001 50' Capacity Reel
- GEN D30002 100' Capacity Reel

This swivel reel will turn 360 degrees, pull hose off in any direction. This reel is rated up to 4000 PSI. Order correct bracket listed below for your application. Q series and TR series do not require any bracket. SH models require universal bracket

It is not recommended to attach a reel to any machine weighing less than two hundred pounds.

- 526496.1KIT MINI SWIVEL REEL 100' Capacity
- 526496.KIT SWIVEL REEL KIT 200' Capacity

526574 UNIVERSAL REEL BRACKET

To attach a reel to any horizontal tube on a machine weighing over two hundred pounds with a diameter of 1.5" or less.

526575 WALL MOUNT REEL BRACKET

To attach a reel to any studded wall or I beam

526576 FLOOR MOUNT REEL BRACKET

To attach a reel to floor

- 540097 10" Draft Diverter
- 540097.1 8" Draft Diverter

Draft diverters are used when installing any hot water pressure washer indoors. They help induce air from the room creating a positive draft for ventilation. Order proper size based on the diameter of the exhaust discharge of the heating coil.

- 552500 10" Blast Gate
- 552510 8" Blast Gate

Blast gates are used when installing any hot water pressure indoors and in climates where outside temperatures and down drafts can cause freezing of the coil while the machine is not in operation. It is also recommended to save on heating costs and cut down on drafts when the machine is not in use.

Accessories

Flat Surface Cleaners are designed to attach to any pressure washer and spray the water through a spinning spray bar to thoroughly clean floors and flat surfaces. When ordering just specify the orifice size you are currently using in your pressure washer or the model number of the machine.

This economical 13" flat surface cleaner is a great addition to any pressure washer and should be used on machines producing at least 3 gpm flow at 1500 psi. Injection molded plastic design with single handle and sturdy brush guard with dual tips. This model attaches directly to your existing wand and attaches at the twist fast coupler. Additional gun/wand # AL200 is needed if your wand is not a 2 piece wand.

526035.(tip size) 13" Flat Surface Cleaner without wheels
 526036.(tip size) 13" Flat Surface Cleaner with wheels.

Stainless steel construction with single handle design and sturdy brush guard with dual tips. This model attaches directly to your existing wand and attaches at the twist fast coupler. Additional gun/wand # AL200 is needed if your wand is not a 2 piece wand.

526032.(tip size) 12" Flat Surface Cleaner
 526033.(tip size) 21" Flat Surface Cleaner

30" ABS plastic housing affixed to a steel sub frame with front caster wheel for maneuverability. Hands free operator valve and double braided wire hose with quick connects attached directly to your existing discharge hose when you remove the wand. This model works best on machines discharging at least 4 gallons per minute.

526028.(tip size) 30" Flat Surface Cleaner

ACCESSORY HOSES

These pressure hoses come with twist fast adapters to hook directly to the hose that comes with your Cam Spray pressure washer.

527651 20' Hose Kit
 527650 40' Hose Kit
 527652 40' Hot Water Hose Kit
 527653 50' Hose Kit

Accessories

Sand Blast attachments combine high pressure water and sand to remove graffiti, paint, baked on grease, rust and much more. Use dry silica sand, baking soda or washed and dried river sand.

527250 LIGHT DUTY SAND BLASTER
Machine use up to 1500 PSI @ 3.0 GPM
Comes with hose, probe and sand blast head with steel orifice.

527300 MEDIUM DUTY SAND BLASTER
Machine use up to 3500 PSI @ 4.0 GPM Constructed of a bronze body, steel orifice and a replaceable tungsten carbide tip. Comes with sand blast head, hose and probe with twist fast adapter to couple to end of wand.

509300 HEAVY DUTY SAND BLASTER
Machine use up to 4000 PSI @ 10.0 GPM Constructed of an aluminum body, hardened stainless steel tip and tungsten carbide sand nozzle. Comes with a sand blast head, hose and probe with a twist fast adapter to couple to end of wand.

Rotating 0 degree pattern packs a powerful punch while maintaining a 15 degree spray coverage for fast cleaning.

TS-58-2 Turbo Tip
Use with machines up to 3000 PSI, for occasional use. Specify orifice size needed or the model of Cam Spray machine you are using.

TS-58-5 Turbo Tip
Use with machines up to 4500 PSI, for heavy use on any machine. Specify orifice size needed or the model of Cam Spray machine you are using.

Order a quick coupler plug # 510060.1 if your machine uses the interchangeable tips, order a # 527700 fast plug if your machine uses the twist fast couplers to connect the tips.

The turbo wand is a low cost alternative for the smaller machines up to 3 gallons per minute at 1500 PSI.

527208 Turbo Wand
Attaches directly to the wand after removal of your current wand-tip half. Specify orifice size needed or the model of Cam Spray machine.

Wand extensions come complete with twist fast coupler and plug for easy hook up to your gun and wand. Made of 1/4" plated steel and a plastic insulator to protect hands. Good for pressures up to 4000 PSI.

527500 24" WAND EXTENSION
509925 36" WAND EXTENSION
509930 79" WAND EXTENSION
509932 8'-24' TELESCOPING WAND

Accessories

Brush Attachments

Cam Spray offers brushes that attach to the wand of your pressure washer. Styles range from reciprocating, rotating and stationary with 24" wand extensions available for those long reach applications.

Foamer Attachment

Cam Spray offers foamer that attach to the wand of your pressure washer. When chemical is used with a foaming agent this unit will create a thick foam, applied at low pressure and will cling to surface.

Sludge Pump

This unique sludge pump is designed to be used on systems of 4 gpm or more at the operating pressure of the machine to remove sludge from pits or any location. Works great in removing leaves and sludge from ponds and fountains.

Chemicals

Cam Spray offers chemicals for road film removing and degreasing. The chemicals are designed to be safe to use and user friendly.

Many more models and accessories are available in pressure washers, drain jetting equipment and water pumps. What you have seen is our best selling models and accessories. If you have a special attachment you are looking for or special application and you are looking to solve a problem just give us a call.

We love to find solutions to your problems. That is what we do best.
